About WitSpeak

WitSpeak is an AI speaking coach for iPhone and Android, developed and published by ZenithNexus AI Technologies LLC (Miami, Florida), that helps learners practice real conversations in English, Spanish, French and German (French and German are in Early Access). Learners pick a practice mode (Free Talk, roleplay or beginner lessons in all four languages; in English also Flow, shadowing, pronunciation drills or IELTS-style sessions with a live AI examiner), speak, and get feedback on fluency, vocabulary, grammar and, where available, pronunciation.

WitAccent (free English accent test)

WitAccent is WitSpeak's free browser-based English accent test (witspeak.ai/witaccent). Visitors read one short passage aloud, about 30 seconds, and the model makes a careful guess about their first-language background across seven groups, or says it is not sure. It does not grade English or verify identity. On a held-out research set the model picked the right group 76.2% of the time (model v3, August 29, 2026); on the live site it held back in 80.5% of 1,655 tests (August 31, 2026 to October 25, 2026). Method and limits: witspeak.ai/witaccent/how-it-works.

Founder

Fatih Can YILDIRIM is the founder of WitSpeak and ZenithNexus AI, an AI app development company based in Miami, Florida that builds consumer AI apps for people chasing serious goals, starting with confident spoken English. He writes the guides on the WitSpeak blog and the WitAccent method notes.
